By the 1990s, AutoCAD was the most widely used CAD program in the world, and its name became synonymous with CAD. Autodesk released AutoCAD 2006 and AutoCAD LT in 2002. AutoCAD is an AutoCAD R15.1 application, and it's available in both 32-bit and 64-bit versions. The AutoCAD LT version is available as a 32-bit, Intel-based program, as well as a 64-bit, AMD-based program. AutoCAD 2017 has various new features such as new 2D and 3D drawing creation and edition, integrated 2D and 3D drafting, improved interface and navigation, new block and component libraries, and much more. AutoCAD 2016, 2015, and 2014 are all available for Windows, Mac, and Linux platforms. They use similar programming codes, and there are no versions for iPads or other mobile devices. What is AutoCAD? AutoCAD (the original name of AutoCAD R15.1) is a 2D and 3D drafting, modeling, and rendering software application. The main features are: • 2D and 3D drawing creation and edition • 2D and 3D plotting, including archiving and text and table printing • 2D and 3D drafting, including importing and converting DXF (Drawing Exchange Format) files to DWG (AutoCAD Drawing) files • 2D and 3D editing, including selecting, linking, zooming, and panning • 2D and 3D modeling and editing, including creating, viewing, editing, importing, and exporting 3D models • 2D and 3D rendering, including exporting DWG files to graphics formats such as EPS (Encapsulated PostScript) • Data Management features, including block libraries and a components library • Geometric Transformations (including object snap) • Numeric and measurement tools • Vector graphics editing, including converting paths to lines, and converting DWG to DWF, DXF, and SVG files • 3D Warehouse, including importing, creating, and exporting 3D models • Technical

Ischemic heart disease and sudden death in athletes. Ischemic heart disease is a major cause of death in athletes, accounting for nearly two thirds of all deaths. The largest numbers of deaths occur in runners and swimmers. Younger male athletes appear to be at particularly high risk for sudden death from coronary atherosclerosis. The hypothesis that the incidence of sudden death from coronary atherosclerosis is higher in runners than swimmers was tested by identifying deaths in six major Olympic Games (Atlanta, Los Angeles, Nagano, Sydney, Athens, and Athens) from 1992 to 2004. All sudden deaths from coronary atherosclerosis in athletes aged 30 to 59 years were identified. A control group of sudden deaths in athletes aged 30 to 59 years without known coronary atherosclerosis was identified in eight major Olympic Games from 1992 to 2004. A total of 105 athletes (72 men and 33 women) from six Olympic Games and 556 control athletes (377 men and 179 women) from eight Olympic Games were studied. The incidence of sudden death from coronary atherosclerosis was 0.5% per year (0.6% per 10,000 athlete exposures in men, 0.3% per 10,000

athlete exposures in women). The incidence of sudden death in runners was 10 times the rate in swimmers (p Former Redskins DC Sean McVay had a really hot week, so hot, in fact, that he might have burnt his house down trying to stop his good self from knocking them out. The most significant play of the week was a 50-yard touchdown to wideout Torrey Smith in the middle of the fourth quarter of the Week 7 matchup between the Redskins and Texans. Had you read the play-by-play on ESPN's broadcast, it probably would have read like this: "WR Torrey Smith goes deep over the middle, and it's a 50-yard touchdown for Smith!" But what happened was this: WR Torrey Smith goes deep over the middle, and it's a 50-yard touchdown for Smith? On a sweep play? In the middle of the fourth quarter of a Thursday night NFL game? Q: PHP : Uploading multiple file How can I create a code to upload all files in a folder at once without the need to change to different ways to upload a single file. A: You can do this with the code: `$input = fopen('php://input', 'r'); if ($input) { while (($buffer = fread($input, 4096)) !== false) { echo $buffer; } fclose($input); }` Please note that this will not work for binary files (such as images, audio, etc), as `fread()` is only suitable for reading text based files. To upload binary files, you will have to use `cURL`.

Three of the countries hosting the Games next year have been accused of undermining Olympic ethics by selling Rio de Janeiro a tainted water supply. Brazil, China and Qatar have been accused of artificially raising water levels in order to help the Rio games go ahead, without considering the potential risks of chlorine pollution in the area. The allegations come as no surprise to Olympic organisers, who already feared a boycott from South American countries if the water issue was not resolved. The city was made aware of the problem in 2011, with the pollution discovered shortly before the World Cup. Rio de Janeiro's water supply is managed by the city's big water
