## Bal Ganesh 1 Full Movie HOT! Download In Hindi

How Do You Travel Through the Web? The Web of the future is going to consist of a web of mind. The web of the minds of people in the near future will contain a link to every person on the planet. If you had a thought, you would be able to simply press a button and send it to one of your friends. When they pressed the button, their mind would allow them to experience your thoughts. If their thought was different from your own, they would have the choice to adopt it, merge it with their own, or ignore it completely. Would you want a thought pushed into your mind at this point? This is the web of the future, and it already exists. The mind is, in fact, a connect-the-dots web where the dots are the thoughts of a billion people, and the lines between dots are the thoughts of billions more. The possibilities of the web of the future are virtually endless. The web of the minds of the world's people would be a "mindnet," a community of nearly a billion people, richly linked, with a common consciousness. The web of the mindnet would connect every person on the planet to every other person, a vast community of ideas, thoughts, emotions, and goals. It would be the web of the future. If you are interested in learning how the web of the minds of people will function, you might want to consider downloading a copy of the complete Resource Catalog from the web of the mind, available at [www.mind.org](http://www.mind.org). As you read the catalog, you can also access files that describe the billions of brain wave patterns of the people on the planet. If you have a Web browser, you can also search the web of the mind for your own particular idea patterns, as I did for the movie *The Rokeby Venus*. There you will be able to read your own thoughts on the nature of love, your experience with the same, and other similar ideas. In fact, if you are interested, you can find the web of the mind itself, and see the individual thoughts of thousands of people. The web of the future is a web of mind, a mindnet. The most extraordinary part of the mindnet is that you are a part of it, and it is you. (Back to TOC)
